Resources

Marketing

- » Sign up to be listed as an Arzel zoning professional and homeowners in your service area will know you are an Arzel zoning expert.
- » Customized literature available for direct mail campaigns, sales calls, and trade shows.
- » Incentive programs and promotions available to contractors to help increase sales.

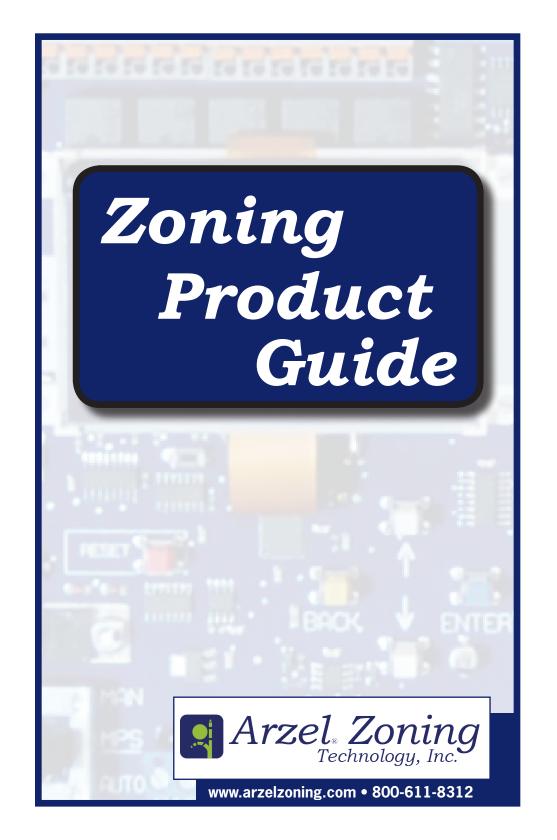

Warranty

- » All Arzel zoning systems are covered by a Lifetime Parts warranty.
- » Simply register the system within 90 days of installation at www.arzel.com/warrantyreg.

Tech Support

- » Contact Arzel® at 800-611-8312 Monday through Friday 8 am to 5 pm with any technical questions or issues.
- » Text "Arzelsupport" to 69302 from 5 pm to 9 pm and a tech will call you back as soon as possible.
- » Visit www.arzelzoning.com anytime for more product information, videos, and other technical resources.

Zoning Overview

When a home or business is zoned, rooms are grouped together according to usage and conditioning needs.

A zoning system usually consists of a control panel, dampers, and a temperature controller for each zone.

Dampers are installed within the duct work and control the air flow to each zone. The zoning control panel is tied into the structure's heating and/or cooling system and when a zone calls for either heating or cooling it opens and/or closes the appropriate dampers.

Training

Webinars

Arzel Zoning offers free, interactive webinars covering the technical aspects of zoning and its products and how to best promote our systems. Call 800-611-8312 or e-mail marketing@arzelzoning.com to register for a webinar and schedule it when it is most convenient for you and your team.

Comfort College

Comfort College is designed as a lecture-lab course in which topics are presented by the instructors in a classroom setting and examined in lab exercises. Each session is eligible for NATE continuing education credit hours.

~ Comfort College Topics ~

- Recognizing zoning opportunities
- Product familiarization
- Zoning system design
- Proper installation techniques
- Sales and marketing concepts

Arzel Zoning

The Arzel® Difference

For over 30 years Arzel Zoning has been manufacturing industry-leading zoning systems that offer the quietest, most efficient, and most reliable solutions to the comfort issues people face in their home or office everyday. Arzel's systems are also the easiest to install, which means it saves contractors time and labor cost. Arzel offers the sales, marketing, and technical support needed to make selling and installing its systems the only option.

How to Sell Arzel

- **1. Get the Home or Business Owner's Input** No one knows the usage patterns better than the home or business owner.
- **2. Design Zones That Make Sense -** Group rooms together on the same floor with the same usage patterns.
- **3. Select the Best Zoning System for the Job** Decide whether installing trunk dampers or branch dampers would be best and select a control panel that best fits the equipment.
- **4. Minimize Bypass** Keeping the bypass to a minimum and taking advantage of the elevated static pressure will increase the air flow and the BTU delivery to the zone.
- **5. Educate the Home or Business Owner -** It is very important to inform the home or business owner what to expect from their system and how to operate the thermostat for each zone. Taking the time to educate the home or business owner adds value to the system for him because it will help save money on utility expenses.

Control Panels

HeatPumPro

HeatPumPro offers the latest in zoning control technology with its built in staging and software-based programming. While the HeatPumPro was originally designed specifically for heat pump applications, the flexibility of the software has made it possible to use it with other heating and cooling systems, such as a heat pump with electric backup, conventional, and dual fuel.

Item ID	Item Description
PAN-HPP02	HeatPumPro 2-zone panel
PAN-HPP03	HeatPumPro 3-zone panel
PAN-HPP04	HeatPumPro 4-zone panel

GTPro

GTPro offers customized comfort control while maximizing the efficiency of geothermal units. It provides built-in controls to several different staging parameters, allowing for more precise management to save time, money, and energy. It is extremely user-friendly and allows for software updates via a USB drive.

Dampers

Inserta

The Inserta Damper features a spring loaded belly band that holds it firmly in any type of round duct. This makes

it a good fit for applications in which the main trunk is accessible but the take-off runs are not.

Item ID	Desc.	Item ID	Desc.
INSRT-5	5"	INSRT-7	7"
INSRT-6	6"	INSRT-8	8"

RegiDamper

Item ID	Desc.	Item ID	Desc.

REG-2X12	2" x 12"	REG-6X10	6" x 10"
REG-4X10	4" x 10"	REG-6X12	6" x 12"

The RegiDamper is the answer when there is no access to the duct. It is installed in the boot directly beneath the floor register.

Bypass

The ModuPass system works with variable speed motors and constantly monitors the static pressure in the trunk and adjusts to allow the prescribed amount of bypass air.

MOD-BYP12

EzyFit

Item ID	Desc.
STK-EZFT5	5"
STK-EZFT6	6"
STK-EZFT7	7"

The EzyFit Damper has a compact folded design which allows you to slip the damper through the register and once installed magnets set it firmly in place.

Control Panels

AirBoss

AirBoss is perfect for larger residences or light commercial applications and can control up to eight zones. It has the flexibility to control single or multi-stage equipment, including heat pumps.

Item ID	Item Description
PAN-AB002	AirBoss 2-zone panel
PAN-AB003	AirBoss 3-zone panel
PAN-AB004	AirBoss 4-zone panel
PAN-AB006	AirBoss 6-zone panel
PAN-AB008	AirBoss 8-zone panel

CoolMizer

CoolMizer is a stand-alone, add-on economizer for split-system, forced air, heating and/or cooling units. It delivers both ventilation air or conditioned air by selectively introducing outdoor air into any ducted heating and/or cooling system.

Item ID	Item Description	
PAN-COOLM	CoolMizer panel	

MPS Series

MPS series is designed for controlling single-stage, heat/cool, high velocity, or heat pump equipment. It is ideal for both new construction and retofit applications.

Item ID	Item Description	
PAN-00202	MPS 2-zone panel	
PAN-00203	MPS 3-zone panel	

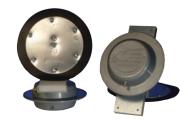

Dampers

Arzel dampers are installed directly into existing duct work, saving you time and eliminating the mess for the homeowner. The unique motor-less design makes them the quietest, most reliable in the industry. Due to the flexibility and simplicity of Arzel's damper installation, you are able to use branch or trunk dampers based on the application and homeowner's lifestyle.

STK-ER0014	14"	

The patented EzySlide dampers are Arzel's main damper. With over 50 sizes in stock, it is easy to find the size and shape that best fits any application. If you don't see the size or shape that will fit your application call your local distributor and have a custom size ordered.

EzySlide - Rectangular

The rectangular EzySlide dampers have the mounting plate and actuator mounted on either the side or bottom of the damper. If the mounting plate and actuator is on the longer dimension the damper is referred to as a bottom-mount damper. If the mounting plate and actuator is on the shorter dimension the damper is referred to as a side-mount damper.
